Research Papers

Simulation of mildly unsaturated flow
J. Letha and K. Elango 1
Response of runoff chemistry to experimental addition of LiF to a pristine catchment at Sogndal, Norway
B.L. Skjelkvåle and R.F. Wright 19
Geochemical evolution of lacustrine brines from variable-scale groundwater circulation
J.J. Donovan and A.W. Rose 35
Measurement of advective water velocity in lake sediment using natural helium gradients
M. Stephenson, W.J. Schwartz, T.W. Melnyk and M.F. Motycka 63
Factors affecting groundwater recharge following clearing in the south western Murray Basin
A. Kennett-Smith, P.G. Cook and G.R. Walker 85
Soil moisture and dry bulk density patterns in bare dune sands
C.J. Ritsema and L.W. Dekker 107
Hydrogeologic analysis of the saturated-zone ground-water system, under Yucca Mountain, Nevada
C.J. Fridrich, W.W. Dudley, Jr. and J.S. Stuckless. 133
The effect of vegetation on soil and ground water chemistry and hydrology of islands in the seasonal swamps of the Okavango Fan, Botswana
T.S. McCarthy and W.N. Ellery 169
Hydrogeochemistry of the volcanic district in the Tolfa and Sabatini Mountains in central Italy
M. Dall'Aglio, V. Duchi, A. Minissale, A. Guerrini and M. Tremori 195
Hydrogeological implications of the resistivity distribution inferred from electrical prospecting data from the Apulian carbonate platform
R. Quarto and D. Schiavone 219
A new method for measuring near-surface moisture budgets in hydrological systems
W.E. Bardsley and D.I. Campbell 245
Measured dewfall and potential condensation on grazed pasture in the Collie River basin, south western Australia
R.A. Sudmeyer, R.A. Nulsen and W.D. Scott 255
Geochemical processes affecting the acidic groundwaters of Lake Gilmore, Yilgarn Block, Western Australia: a preliminary study using neodymium, samarium, and dysprosium
K.H. Johannesson, W.B. Lyons, J.H. Fee, H.E. Gaudette and J.M. McArthur. 271
Comparison of methods for determination of total solutes in flowing waters
B.R. Taylor and H.R. Hamilton 291
Strontium isotopes as indicators of the dissolving phase in a carbonate aquifer: implications for ^{14}C dating of groundwater
P.K. Bishop, P.C. Smalley, D. Emery and J.A.D. Dickson. 301
Delivery of marine chloride in precipitation and removal by rivers in the Murray–Darling Basin, Australia
H.J. Simpson and A.L. Herczeg 323
Porosity and permeability variations in fractured and liesegang-banded Breathitt sandstones (Middle Pennsylvanian), eastern Kentucky: diagenetic controls and implications for modeling dual-porosity systems
L. Fu, K.L. Milliken and J.M. Sharp, Jr.. 351
Observed seasonal hydrological behaviour used in flow forecasting on the Yangtze River above Hankou
G.C. Liang and Y.F. Guo 383

Discussions

Hydraulic calculation of groundwater flow velocity and age: examination of the basic premises — Comment
T. Torgersen 403
Stagnant groundwater stored in isolated aquifers: implications related to hydraulic calculations and isotopic dating — Reply
E. Mazor and R. Nativ 409
